## A floor that breaks the mold

Wood flooring is no longer confined to living rooms and bedrooms, it's making a bold entrance into the kitchen.

Thanks to cutting-edge innovations in finishes, including our advanced urethanes and natural oils, Panaget floors are now perfectly suited to this high-traffic, high-demand space.

While not waterproof, our surfaces are engineered to handle the rhythm of everyday life without compromise.

So go ahead, make your kitchen as inviting as the rest of your home, with all the warmth and authenticity only wood can offer.

## Performance meets elegance

Our expertise allows us to deliver more than just beautiful floors, we offer peace of mind.

Panaget kitchen floors combine refined aesthetics, daily comfort, and proven durability. It's no surprise we back them with a 30-year warranty when installed and maintained according to our guidelines.

No matter the finish, urethane or oiled, every floor in our collection is engineered for kitchen-ready resilience.

The choice is purely yours, based on your personal style.

## Care tips for long-lasting beauty

- Routine cleaning: Dust regularly and clean monthly with cold water and a microfiber mop. Wipe up splashes quickly to prevent water damage.
- For oiled finishes: Refresh the natural protection with maintenance oil once or twice a year.
- Floating installation: Follow our technical guidelines carefully, particularly around expansion gaps and maximum surface limits.
